Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 31 October 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

1. Applicant's election without traverse of claims 1-2,10-13 in the reply filed on 31 October 2005 is acknowledged.

Claims 3-9 and 14-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-2, and 10-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Aoki (5,943,519).

Regarding claim 1, Aoki discloses an information recording apparatus (figs 2 and 22) , comprising:

a first portable electric power source (20)

a first detector circuit for detecting remaining capacity 5 of said first electric power source (86) ;

Art Unit: 2616

an external power source (19) terminal of a second electric power source, being connected to an outside;

a second detector circuit (87) for detecting that the second electric power source is supplied to said external power source terminal;

a recording circuit (41, 67) for recording information on a removable recording medium; and

a finalizing process circuit for executing finalizing process for said recording medium by recording information on the medium when the first detector detecting that the examining capacity of the first electric power supply to the value higher than a predetermined value wherein when either one of the remaining capacity of said first electric power source and voltage of said second electric power source is detected to be equal or higher than a predetermined value, in said first detector circuit and said second detector circuit, operation of finalizing process is started by said finalizing process circuit upon said recording medium (column 7, lines 10-20, column 22, lines 1-65).

Further for claim 2, Aoki further teaches a final process to the medium when both the voltages of both of first power source and the external power source are higher than the predetermine value. (column 22, lines 1-65).

Method claims 12 and 13 correspond to apparatus claims 1 and 2. Therefore method claims 12 and 13 are rejected by the same reason as applied to apparatus claims 1 and 2.

Regarding claims 10 and 11, Aoki further teaches the information recording apparatus is a portable type recording apparatus and the medium is a disc (Fig. 2, column 22, lines 50-65).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yamagishi teaches a recording apparatus having a power control means for controlling recording operation bases on the status of the power supply in the apparatus .
